

Application Refresh

The process to complete an Application Refresh has changed with the update to the Citrix Web Interface.

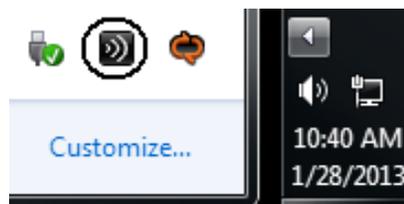

Old way of doing an Application Refresh:

- **Right click the Citrix Online Plug-in in the system tray (lower right hand corner), choose **Application Refresh****

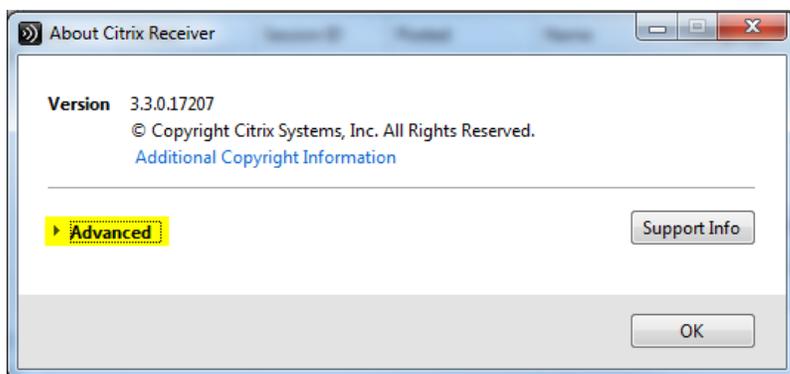

New way of doing an Application Refresh:

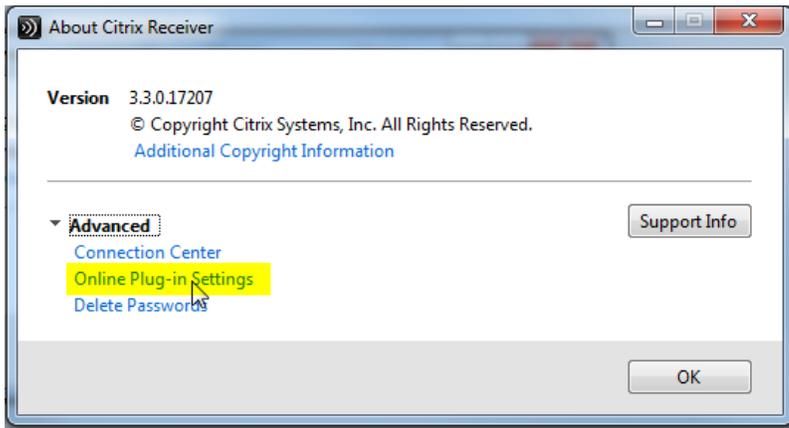

- **Double click the Citrix Receiver in the system tray (lower right hand corner)**

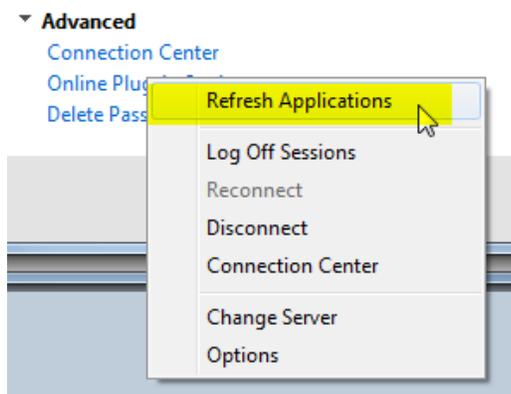

- **An "About Citrix Receiver" window will pop-up, and in that window Click on *Advanced***

- **Under advanced, click on *Online Plug-in Settings***

- In the menu that pops up, click Refresh Applications

- Your applications in your CONNECTIONS and Other Application folder have now been refreshed
